## Quick view

In the last six months I worked at *Pearson* as Learning Services Consultant: I had reunions with teachers, coordinators and directors to understand needs and preferences, and then guide and provide English materials accordingly, also making presentations when needed. Before that I learned some comercial and management skills co-founding and working at our *Juice Bar*.

In the past five years I worked in academic environments: supervising research projects, giving sociology classes and English conversation. In all cases I feel at ease in a environment that relates to publishing, programming and service.
