Professional Profile

I was focused, as a researcher, on ethnographic observation and interviews. I did visual sociology research on graffiti, compiling pictures with LaTeX [wysiwym], so they look well and properly placed The UI of the final thesis document was a first step to start thinking on how to progress on a product development thru a full cycle.

Recently, I was in tech roles, and learned to target for market fit, focus on proper scope, attend to User Experience [UX], apply results, measure, and improve.
